

Amendments to the Specification:

Please replace the paragraph beginning at page 32, line 11 with the following rewritten paragraph:

FIG. 10 is a schematic illustration of an image that is supplied from the application section 11 and displayed on a display screen;

Please replace the paragraphs beginning at page 38, line 17 and ending at page 39, line 13 with the following rewritten paragraphs:

FIG. 10 is a schematic illustration of an image that may be supplied from the application section 11 and displayed on a display screen 1000.

The central area 1002 of the display screen 1000 is the area to be used by the application main body.

The upper left display area 1004 of the display screen 1000 shows the image currently being picked up by the camera. The lower left display area 1006 of the display screen 1000 shows the image currently being picked up of the connected device. The currently connected device is a device being “viewed”, which is a device that is being shot by the camera or selected by some other means. ~~In the instance of FIG. 10, an An~~ image taken by the camera of the display monitor that is currently connected is can be displayed. If the connected target has a name or an ID, it may be displayed along the lower edge 1008 of the window frame.

A list of the devices 1010 that can be connected is shown at the right end of the display screen 1000. The list of the devices 1010 to be connected is realized in the form of a buttons 1012 representing the (still) images of the respective target devices to be connected that are taken by a camera and arranged in time series. The connection procedure for connecting a desired target and the user terminal 10 can be called by selecting (clicking) the button representing the target.
